Hello Cliff,

Unless you need to meet with me, I do not need to meet with you. Not that I wouldn't enjoy the visit. I will be giving some of my folks a quick site tour. We will stay away from any building tours. If you need to reach me my cell phone is: 406-202-3791.

Hi Mike

Steve Wright said you would be at the plant on Thursday this week. Do I need to be here for any reason for further discussions with concrete or another element of the Demolition? Per your request in your June 07, 2017 concrete letter, I reached out to the MDEQ Solid Waste folks to make sure the removal, recycling of steel and crushing of the concrete is in accordance with the MDEQ Waste Management Plan. I was asked numerous questions about the pressure washing. I did a one day pressure wash test to figure out the productivity and have not pressure washed any further.

Brad Jones and Rick Thompson had numerous questions about the concrete for suitability for fill from MDEQ as well.

John Strozio sent me an email this week stating the following "Calbag is responsible under the Demolition Agreements for obtaining necessary permits and complying with applicable laws, including those relating to the crushing of concrete and use of concrete as fill material" "We expect Calbag to obtain all approvals needed to perform this work. We are willing to cooperate with Calbag in order to facilitate Calbag obtaining these approvals, but it is ultimately Calbag's responsibility to obtain them"

If there is any question or anything you would like to see at the plant while you are here on Thursday I am happy to accommodate.

Cliff
